

Domestic Airline Fee Chart

Last updated: June 14, 2010

The cost of air travel now includes much more than the price of airfare. Airlines continue to add fees for everything from checked baggage to blankets and pillows as the "a la carte" pricing model becomes more common. Our Airline Fee Chart breaks down what a range of domestic carriers are charging for specific services and additional "perks," so you can plan ahead and maybe save some money on your next flight.

Along with these fees, certain carriers have also added a surcharge to some of the most popular travel days throughout the year. Check our [Peak Travel Day Surcharge Chart](#) for a look at which days will cost you more to fly.
